

Yong Zhou is currently a graduate student in biomedical engineering at Washington University in St. Louis, under the supervision of Dr. Lihong V. Wang, Gene K. Beare Distinguished Professor. His research focuses on the development of photoacoustic imaging systems.

Jinyang Liang is currently a postdoctoral research associate in the Department of Biomedical Engineering. His primary research focuses on the implementation of optical modulation techniques to develop modern optical instruments for applications in biology and physics. He received a PhD in electrical engineering from the University of Texas at Austin in 2012.

Lihong Wang, the Beare Distinguished Professor at Washington University, has published 425 journal articles (h-index = 96, citations > 36,000) and delivered 420 keynote/plenary/invited talks. His laboratory published the first functional photoacoustic CT and 3D photoacoustic microscopy. He received the Goodman Award for his “Biomedical Optics” textbook, NIH Director’s Pioneer Award, OSA Mees Medal, IEEE Technical Achievement and Biomedical Engineering Awards, SPIE Britton Chance Biomedical Optics Award, and an honorary doctorate from Lund University, Sweden.
